VETC Track 3: AI Gamification & User Engagement Platform

Vietnamese

Synthetic user profiles, activities, existing VETC services, existing loyalty/rewards, current campaigns, personas, mock APIs, design hints and evaluation scenarios.

This dataset is synthetic and does not contain real VETC users, transactions, partners or internal business data.

The dataset intentionally does not provide a complete Mission Catalog, Achievement Catalog or XP system. Teams should design these themselves.

Participants use the data to personalize missions, challenges, rewards, progression, notifications and next-best-actions.
